Re: Electronic Publication of the dissertation

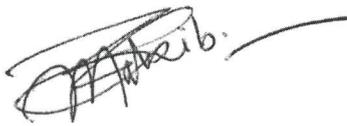

In accordance with the RerNat-O § 21 (8), we hereby ask that only the abstract will be made publicly available, but not the entire dissertation, for a period of twelve months after the date of the thesis defense.

Title of dissertation:

Epigenomic and transcriptomic analysis of developing, adult and aging brain: mechanisms of brain folding, neuronal function and finding novel therapy for dementia

Reasons why the entire dissertation should not be made publicly available yet:

I hereby apply for a restricted application of my entire dissertation. Since it is a cumulative dissertation consisting three unpublished manuscripts, and are still in review phase in journals, until their acceptance, the dissertation cannot be published online. Therefore, I would earnestly request you to grant me permission to restrictively publish my PhD dissertation and only publish it in full form once all the manuscripts are accepted/published.
